

PHYSIOPATHOLOGY OF ILLICIT DRUGS (cannabis, cocaine, opiates)

**Proceedings of the First International Symposium,
organized at the National Academy of Medicine,
with the assistance of the City of Paris
Paris, May 31, 1990**

Editors

GABRIEL G. NAHAS and COLETTE LATOUR

Assistant Editors

NOAH HARDY and PHILIPPE DINGEON

Traduction

CHRISTIANE NAHAS

CONTENTS

List of Contributors

Foreword— *Jacques Chirac*

Introduction — *Gabriel Nahas*

I. CANNABIS

Use of positron emission tomography to investigate the action of marihuana in the human brain

— *N.D. Volkow, H. Gillespi, N. Mullani, L. Tancredi, L. Hollister, M. Ivanovic and C. Grant*

Heavy marihuana use and recent memory impairment

— *R. Schwartz*

Commentaries : *C. Spadone*

V. Guieu

Cannabis and Schizophrenia : Is there a causal association?

— *P. Allebeck*

Commentary : *B. Defer*

Marijuana and upper aerodigestive tract malignancy in young subjects

— *P. Donald*

Commentary : *L. Luboinski*

The effect of maternal marijuana use during pregnancy on fetal growth

— *S. J. Parker and B.S. Zuckerman*

Commentary : *H. Tuchmann-Duplessis*

Changes in human spermatozoa associated with high dose marihuana smoking

— *W.C. Hembree III, G.G. Nahas, P. Zeidenberg and H.S. Huang*

Cannabis and immunity

— *H. Friedman*

Marijuana decreases macrophage antiviral and antitumor activities

— *G.A. Cabral and R. Vasquez*

Maternal marijuana use and leukemia in offspring

— *J.P. Neglia, J.D. Buckley and L.L. Robison*

Commentary : *J.L. Binet*

Mechanism of cytotoxic action of THC at the molecular level : facts and hypothesis

— *B. Desoize, C. Latour and G. Nahas*

II. COCAINE and CRACK

Use of positron emission tomography to investigate cocaine

— *N.D. Volkow, J.S. Fowler and A.P. Wolf*

Cocaine and adrenergic neurotransmission

— *G. Nahas, R. Trouvé, W. Manger and C. Latour*

Cocaine and activation of renin angiotensin system

— *R. Trouvé, C. Latour and G. Nahas*

Cardiovascular tolerance to cocaine and receptor desensitization

— *P. Digeon, C. Latour, J. Fiet and G. Nahas*

Myocardial damage induced by chronic cocaine administration to the rat

— *M. Maillet, D. Chiarasini and G. Nahas*

Cardiovascular complications of chronic cocaine abuse

— *R. Virmani*

Cocaine and the heart : Clinical and Pathological Correlations

— *S.B. Karch*

Cocaine psychosis

— *C. O'Brien and G.E. Woody*

Commentary : *X. Laqueille*

Maternal and fetal effects of cocaine abuse

— *M. Finster and H. Petersen*

Commentary : *R. Henrion*

III. OPIATES

Psychometric testing and CT scans of long term opiate addicts

— *J. Strang and H. Gurling*

Commentary : *D. Frédy*

Opiates : Immunodepression and genotoxicity effects

— *A. Falek, R.M. Donahoe, D.A. Shafer and J.J. Madden*

Mechanisms of opiate-induced immunodepression. Current concepts.

— *J. Hamon*

Opiates during pregnancy : neurobehavioral effects in the offspring

— *D. Hutchings*

Commentary : *M. Auroux*

Opiates and psychopathology in therapeutic communities

— *M. Rosenthal*

Commentary : *P. Olié*

Conclusion
